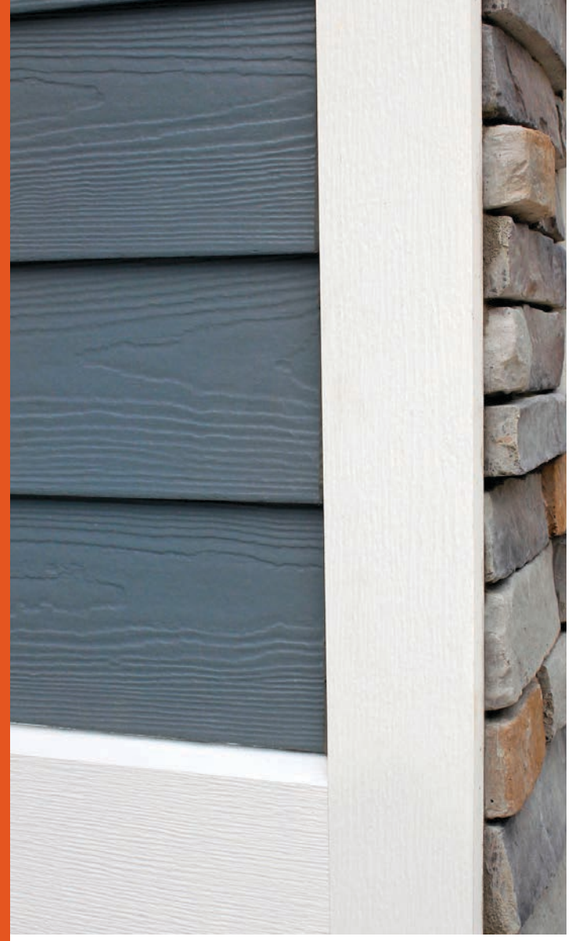
STEALTH TRIM SYSTEM



WE SURROUND YOU WITH OPTIONS.

While parts and pieces of our VERSATEX Stealth Trim System have been copied by the competition, no one offers more options or better quality.

Stealth™ VERSATEX® TRIM SYSTEM

The VERSATEX Stealth Trim System is designed with the builder in mind. Our system allows for faster and more aesthetically pleasing installations time after time. The 3/4" pockets accommodate any siding product including fiber cement, cedar and vinyl, and our Stealth Skirtboard is the answer to meeting manufacturers' 6" ground, asphalt, concrete or deck clearance for fiber cement sidings as well as composite and wood sidings.
