

D. Physical Properties

Technical Bulletin D-2

VERSATEX Chemical Resistant

The following is a list of chemical reagents. The codes represent VERSATEX resistance to each reagent. The code numbers and what they represent is as follows:

Level 1 – Inert; Level 2 – Limited; Level 3 – Very Limited; Level 4 – Non Resistant

Reagent	Code
Glacial acetic acid	2
Hydrogen Peroxide (30%)	1
Acetone 4 N1	4
Hydrofluoric acid (40%)	1
Ammonium hydroxide (concentrate)	1
Hydrochloric acid (concentrate)	1
Carbon tetrachloride	3
Most detergents	1
Seed of mineral oils	1
Turpentine	1
Sodium Carbonate solution (20%)	1
Toluene	4
Methyl alcohol	1
Sulfuric acid (concentrate)	1
Sodium hydroxide solution	1
Citric acid (10%)	1
Ethyl alcohol	1
Ethyl acetate	4
MEK	4
Muratic Acid	1
